

JomSocial XMap Extension (JS XMAP)

The JomSocial XMap Extension (**JS XMAP**) is a useful Add On for JomSocial sitemap generation.

JS XMAP is an XMap extension that automatically builds the JomSocial sitemap, according to the set configuration.

JomSocial sitemaps generated by **JS XMAP** include up to:

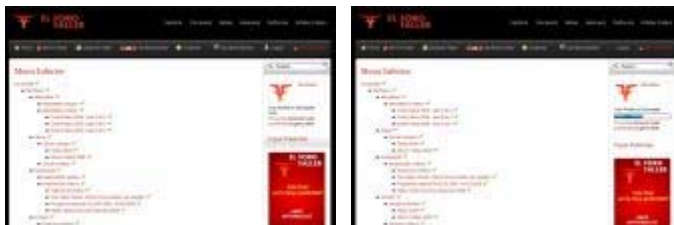

- **3 links per member**
- **2 links per album**
- **1 link per video**
- **1 link per group**

For Search Engine Optimization, this extension has been designed to include all your JomSocial contents, while avoiding content duplication.

JS XMAP, used together with **JS SEO TAGS**, gives you best Search Engine Optimization results for your JomSocial social network.

- **Videos Priority:** sitemap priority for member videos.
- **Member Videos Change Frequency:** change frequency for member videos.
- **Groups Priority:** sitemap priority for JS member groups.
- **Groups Change Frequency:** change frequency for JS member groups.

JomSocial SEO Optimal Configuration

For best JomSocial Search Engine Optimization, two Latitud WEB Joomla extensions can be used. **JS XMAP** automatically generates a sitemap for all your JomSocial content, and **JS SEO TAGS** builds Title and Description HTML metatags fetched by Internet Search Engines. A combination of both Add On's, **JS XMAP** & **JS SEO TAGS** provide the best Search Engine Optimization for JomSocial.
